

# Viewpoint eDiscovery

Skillfully manage litigations with current and efficient digital technology.

**Challenges we help solve**

- Growth and complexity of data
- Increasing and changing regulations
- Time and cost of document review
- Third party vendor and technology inefficiencies
- Ability to leverage disparate data sources to enrich reporting
- Employee and customer privacy protection
- Resource intensive processes
- Excessive outside counsel spend
- Cross-matter data reuse

Driven by the rapid pace of business, regulatory change and expanding volumes of information produced each year, legal and compliance departments struggle to keep up.

**Information is an organization’s lifeblood.**

The call to harness technology to simplify processes that capture key informational data, help organizations regain control and become more intelligent and proactive has never been greater.

Conduent Legal and Compliance Solutions integrate data analytics, technology and expert professional services to help solve legal, compliance and business challenges — fostering sound decision making, smart data capture and reduced costs.

**Viewpoint eDiscovery**

Our all-in-one eDiscovery software offers completely integrated functionality in a single product: collection, pre-processing/processing, ECA, review (technology-assisted and/or linear), analysis, production and case management. Viewpoint gives you the flexibility, scalability and automation to manage eDiscovery processes the way you need them to work for your unique requirements and caseload.

**Reporting and Business Intelligence**

Our Client Portal provides you with a single, centralized view into all reporting, visualizations and analytics across all of your legal and compliance matters with Conduent Legal and Compliance Solutions. Advantages include:

- Transparency—obtain comprehensive view into all matters, metrics and costs
- Cost savings—proactively manage the cost of your active matters to save on legal expenses
- Unified reporting metrics across your entire portfolio of legal and compliance matters
- Make apples-to-apples comparison of metrics across projects
- Understand total scope of engagements under management

**Managed Document Review**

Alongside our platform, we provide rapid-response, high-volume document review and translation services by expert legal teams. Working with Conduent, you gain access to a bench of thousands of professionals located in key locations around the globe.

Reviews are led by domain experts who work in close collaboration with counsel and are guided by experienced attorney project managers. Every review is customized to specified case needs and conducted by highly qualified, review professionals.

## Case Study

75% reduction of human analysis

### Our Challenge

- Our client announced a bet-the-company merger and received scrutiny from US competition authorities via a Federal Trade Commission Second Request.
- The competition authorities requested millions of documents from company employees located around the world, which needed to be collected, reviewed, redacted and produced.
- The client required a heightened level of support to meet the demanding timelines required to challenge the administrative complaint.

### Our Solution

- We designed a dual-shore, follow-the-sun approach leveraging our data analytics suite, supported by 100 attorneys in India, alongside US-based Chinese and Norwegian attorneys and a US-based privilege QC team.
- More than 2.5 million documents were reviewed, redacted, translated, and logged for privilege over nine months.
- 200,000+ documents were reviewed and produced on a rolling weekly basis in the final month of the project, with productions required within days of collection and processing.

### Our Results

- By meeting numerous rapid discovery deadlines, we ensured substantial compliance with the government's demands.
- Our analytics tools reduced the review corpus from 10 Million to 2.5 Million documents
- Compliance with a Second Request completed accurately and efficiently with a **75% reduction of human analysis**
- Offshore review provided significant cost savings and ensured 24-hour support to meet the quick turns required, while higher value tasks remained onshore to ensure defensibility.

## Ignite your digital transformation

Our experience delivering technology-enabled risk, compliance and litigation solutions goes back more than 15 years. Our scope of expertise, leading-edge technology platforms and flexible options equip us to meet your challenges and help you reach new levels of success across your legal and compliance landscape.
