CONDUENT
Transportation

Transportation

On behalf of government agencies and authorities in the transportation industry, we deliver mission-critical mobility and payment solutions that improve automation, interoperability, and decision-making to streamline operations, increase revenue, and reduce congestion while creating safer communities and seamless travel experiences for consumers.

Client outcomes

Improved revenue, reduced costs and improved efficiencies and insights.

End user outcomes

Streamlined travel that gets travelers to destinations faster, simple payment options, and safer communities.

Solutions/Services

Curbside Management

On behalf of government agencies and authorities in the transportation industry, we deliver mission-critical curbside management, parking enforcement and ticket processing, dynamic pricing, and payment solutions that improve automation and decision-making to optimize the curb space, streamline operations, increase revenue, and reduce congestion while creating seamless travel experiences for drivers.

Public Safety

In partnership with government agencies, authorities, and law enforcement focusing on public safety, we deliver mission-critical photo enforcement, violations processing, and data analytic solutions that reduce and prevent dangerous motorist behavior, improve automation, and provide data to support critical decision-making to streamline operations and encourage change in driver behavior while creating safer communities.

Road Usage Charging

On behalf of government agencies and tolling authorities, we deliver mission-critical road usage charging, management, business intelligence, customer care services, and processing solutions that improve automation, payment transactions, and decision-making to streamline operations, increase revenue, and reduce road congestion while creating seamless experiences for travelers.

Transit

On behalf of government agencies and authorities in the public transportation industry, we deliver mission-critical fare collection, fleet management, and intelligent mobility solutions that improve automation, interoperability, and decision-making to maximize assets, streamline operations, strengthen payment security, and reduce congestion while making journeys more personalized and convenient for riders.
