

Strataware® Capture+ Digital Intake and Processing Service

Conduent provides a true end-to-end solution for our bill review customers.

Strataware Capture+ combines bill intake, digital processing and tracking with automated claim linking for seamless submission of bill data and supporting documents into our Strataware medical bill review application.

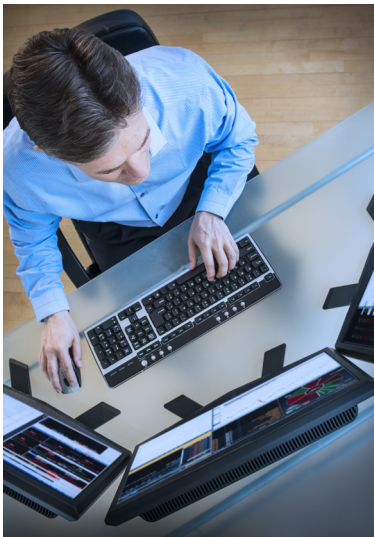

Capture+ Benefits

Fast, low-cost implementation

High quality data capture and verification

End-to-end process and quality control

Ability to track bill inventory and status online, at any time

What is Strataware Capture+ ?

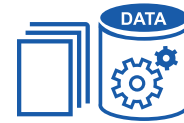

Strataware Capture+ is a complete, integrated service for the capture and secure delivery of medical billing data and related claim documents into the Strataware medical bill review application. It is suitable for organizations of all sizes who want to eliminate error-prone manual document handling to improve speed and accuracy. Whether you're handling 100 bills a day or 10,000, Strataware Capture+ simplifies intake and processing to deliver faster turnaround times and a better customer experience.

Strataware Capture+ is ready-built. As a standardized solution for bill intake and data-capture processing, it can be implemented easily for seamless bill data ingestion into the Strataware bill review platform.

Mailroom and electronic intake

Secure physical and electronic mailroom intake is support for secure receipt and imaging. Physical bills are imaged the same day they are received.

OCR and data capture

Full-page, multi-engine optical character recognition is used on all bills. Hybrid OCR/data capture is applied to ensure all documents are captured efficiently and accurately. Onshore and offshore data entry models are available, all within Conduent facilities with our personnel.

Web portal provides real-time visibility

Web-based reporting capabilities deliver near real-time data on workflow status from bill receipt to submission into Strataware.

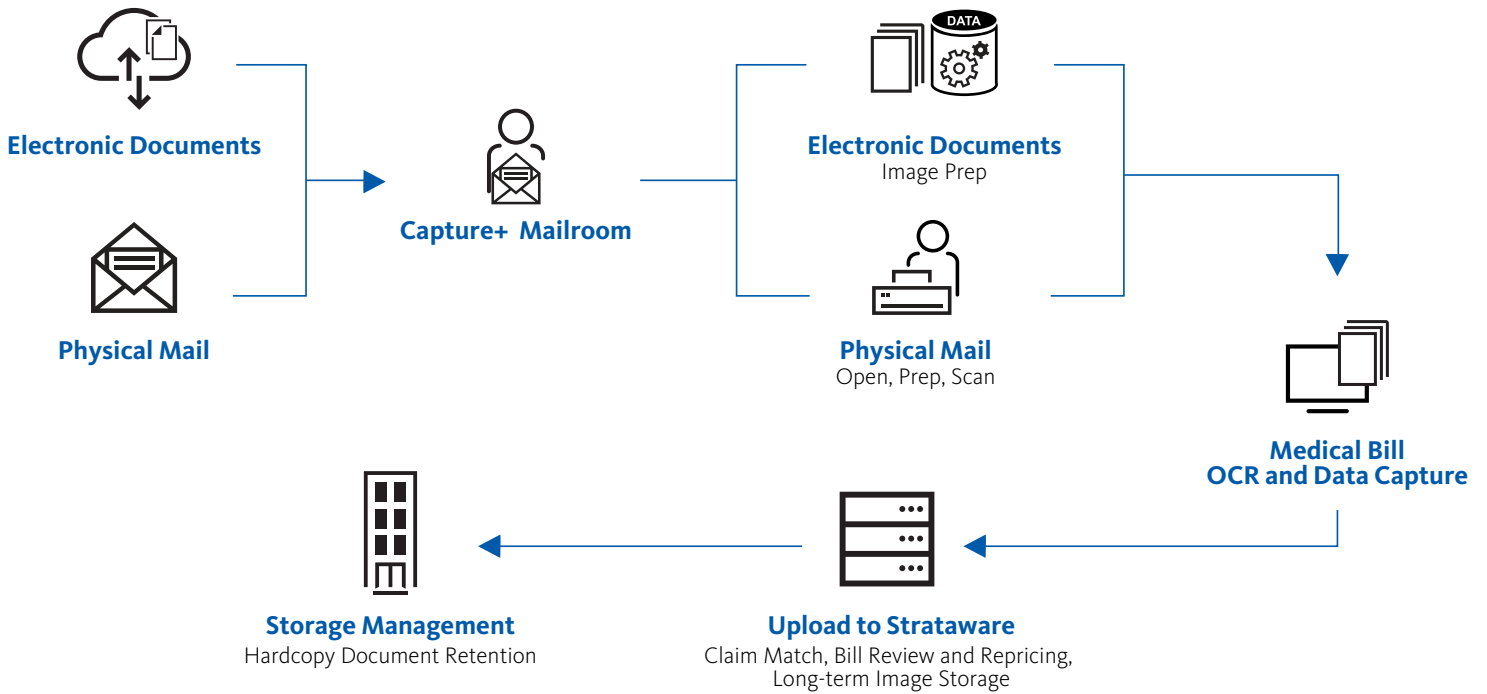

Automated claim linking

Capture+ leverages the Strataware claim database and claim matching technology, eliminating the need to send a separate claim feed.

Connect the dots with Capture+

With Strataware Capture+, you can now take advantage of a complete, integrated bill intake and processing solution for fast and cost-effective bill intake and processing.

Reporting Capabilities

Bill status is available 24/7/365.

Web-based summary reports and drill-down capabilities provide full transparency of bill processing status. Data is exportable to various formats.

Electronic intake reports provide file-level information for every e-file submission. Users can see exactly what each file contained and the status of bills within the file for 100% confidence that all files submitted are processed.

Quality and turnaround time reporting ensures goals are being met.
