Midas Health Analytics Solutions

Midas Statit piMD™ – Improving Patient Safety and Quality Management

Midas Statit Performance Indicator and Management Dashboard (piMD) help nurture a “culture of quality.”

The value of process improvement techniques and benefits help create structures and processes to monitor performance, identify deficiencies, and to devise, test, and implement solutions. Whether you are a single hospital, ambulatory care center, or a large, integrated delivery system, Midas Statit piMD™ provides a simple, yet powerful way to access, track, analyze, compare, and contrast raw data. This provides insights to help you make objective, sustainable, and defensible decisions.

Improving clinical quality, patient experience, and satisfaction while reducing costs can only come with understanding. Midas Statit does not make your quality decisions…we make your quality decisions better.

Midas Statit has been in the process improvement and data analytics business for more than 25 years. We provide Web-based products together with professional services to help healthcare providers bring their care more closely in line with identified “best practices.”

We have developed Midas Statit piMD™ through our extensive work with our healthcare customers, including Intermountain Health Care, SSM Health, Sutter Health, Fletcher Allen Health Care, OhioHealth, Kaiser Permanente, and more than a hundred other organizations.

Do you want to receive one email per day if your target is not met, if you have an SPC alert, or if the “process expert” has made any changes to the indicator? Simply subscribe to your set of indicators with the business rules important to you. No need for IT resources; it’s as easy as “point-and-click.”

How can you tell if a corrective action is having the desired result by comparing the pre- and post-corrective action process? Simply click “Identify Process Phase” and allow Midas Statit piMD™ to make a statistically-derived analysis.

Call Conduent Today

Conduent has a team of dedicated staff with expertise in the healthcare industry. Let us show you how Midas Statit piMD™ can give you a clear, intuitive picture of the quality of care you provide compared with your targets or external benchmarks. Midas offers a full spectrum of training, consulting, and implementation services that help our customers become more effective immediately.
Key Features and Benefits

With Midas Statit piMD™, you can:

- Access and display your existing Midas data, databases, spreadsheets, and ancillary data sources
- Cut through the clutter and prioritize attention to improvement initiatives with a better understanding of process variation
- Provide your “process experts” with interactive capabilities to validate new data, initiate a new phase, and create comments and action plans
- Create an indicator view that is specific and available to you upon login, helping each person manage their indicator responsibilities
- Move forward without the need for IT resources
- Build consensus by deriving knowledge objectively to support timely data-driven decisions

Web, Dashboard and Quality Information

The next frontier in the application of quality improvement is in seamlessly linking enterprise-wide efforts to real-time CQI dashboards.

While many Performance Improvement (PI) departments periodically share progress in quality improvement projects and focus reviews with leadership, progressive healthcare organizations are using Midas Statit piMD™ Web dashboards, scorecards and trend output to provide their leadership with continuous feedback on critical organizational metrics without manual intervention.

Automation enhances your capability and capacity to conduct QI/PI projects and gain actionable knowledge for informed decision-making from them faster, and without resource expenditures.

Focused Analytic Power with Simplicity Built In

Midas Statit piMD™ was designed by healthcare professionals. People want to know what they are responsible for, and our solution provides tangible ways to build accountability into your quality control process.

Midas Statit piMD™ provides automated reports when new data is updated, displaying easily identifiable images, which makes it easy to create your unique display and automated notifications.
